

2.6 Practice B

In Exercises 1–9, solve the inequality. Graph the solution, if possible.

1. $|2x - 9| < -8$
 2. $|5q - 1| - 7 \geq 2$
 3. $|y - 2| + 11 > 0$
 4. $5|12 - r| > 15$
 5. $-2|3d - 5| \leq 10$
 6. $3|2a + 8| - 11 \leq -5$
 7. $-2|1 - 3h| + 9 < -12$
 8. $5|-p + 2| + 4 > 4$
 9. $\frac{1}{3}|2x + 3| - 1 \leq 8$
10. The thermometer in a freezer is set at -2°F . This temperature varies by up to 3°F throughout the day. Write and solve an absolute value inequality that represents the range of temperatures (in degrees Fahrenheit) of the freezer throughout the day.
11. Describe and correct the error in solving the absolute value inequality.

$$\begin{aligned} \times \quad & |x - 5| + 2 < 8 \\ & -8 < x - 5 + 2 < 8 \\ & -5 < x < 11 \end{aligned}$$

In Exercises 12–14, write the sentence as an absolute value inequality. Then solve the inequality.

12. A number is more than 12 units from 0.
13. One-third of a number is at least 5 units from 31.
14. Twice a number is no more than 7 units from 13.
15. Write an absolute value inequality that represents the situation. Then solve the inequality. The difference between the perimeters of the figures is not greater than 10.
