### 2.7 Practice B

## In Exercises 1-3, write an equation of the parabola in vertex form.

1. passes through $(4,-7)$ and has vertex $(1,-6)$
2. passes through $(5,-4)$ and has vertex $(-2,5)$
3. passes through $(2,2)$ and has vertex $(-1,-1)$

## In Exercises 4-6, write an equation of the parabola in intercept form.

4. $x$-intercepts of 12 and 8 ; passes through $(9,5)$
5. $x$-intercepts of -7 and -1 ; passes through $(1,1)$
6. $x$-intercepts of -9 and 9 ; passes through $(0,4)$
7. Describe and correct the error in writing an equation of the parabola.
$X$ Vertex: $(3,-5)$
Passes through $(1,-7)$

$$
\begin{aligned}
y & =a(x-h)^{2}+k \\
-5 & =a(3-1)^{2}+(-7) \\
-5 & =4 a-7 \\
2 & =4 a \\
\frac{1}{2} & =a
\end{aligned}
$$

The equation is $y=\frac{1}{2}(x-1)-7$.
8. The graph shows the area $y$ (in square feet) of rectangles that have a perimeter of 200 feet and a length of $x$ feet.
a. Interpret the meaning of the vertex in this situation.
b. Write an equation for the parabola to predict the area of the rectangle when the length is 2 feet.
c. Compare the average rates of change in the area from 0 to 50 feet and 50 to 100 feet.
